

Desktop Hidden Socket series offer a solution of compact & beautiful desktop signal connection. It adopts the access mode of easy & convenient usage.

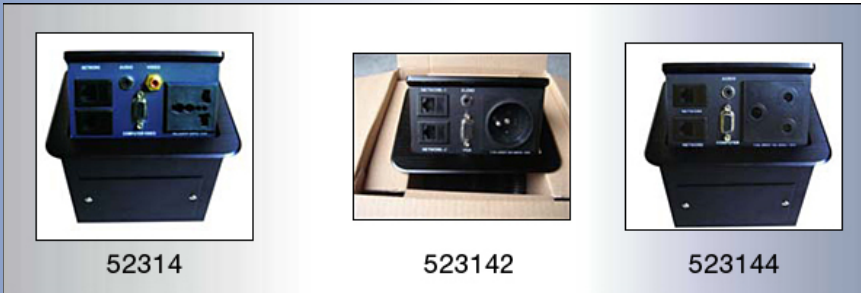

Press the top of the box: the Mechanical Locking Device will be released and the connection panel will be opened smoothly by the Pneumatic Support Structure, and you can use the seams on the panel to which you can connect Video, Audio, Network, Telephone, Power and so on.

After using, just press the panel cover: the Mechanical Locking Device will lock the box. The locked connection box is flush with the tabletop and all the connections are hidden dexterously.

The neat & elegant topside of the box with the tabletop form an integrated mass.

Cable Box  
Aluminum spring loaded lid. Steel box.
